We are also offer leasing plans to support the implementation of solar power generation systems complete with a guarantee of volume of power generated.</p>				
	Message/Other	<p>We are developing business in seven countries abroad (Thailand, Vietnam, Philippines, Malaysia, Cambodia, Myanmar, and Indonesia). We have constructed solar power generators as ODA projects in other countries as well. Besides photovoltaic generation, we are concentrating on cogeneration and small-scale hydraulic power using gas engines etc. Additionally, we are strengthening our effort on the projects using grants from the Japanese government (ODA, JCM etc.) and the projects that applied FIT. We would like to actively support projects related to renewable energy, energy conservation and environmental improvement proposals not only in Japan but also overseas.</p>				
	Examples of Products	<p>ω-aria (omega-aria) (new air conditioning system for IDC) Solar power generation with a leasing plan including a power generation volume guarantee</p>
